WHY CHOOSE MABUHAYTECH

Our collaborative process from strategy to successful delivery.

WHO WE ARE

MabuhayTech Corporation is an AI-powered software development and creative technology company delivering advanced software, AI, automation, and digital transformation (DX) solutions. We empower businesses to innovate, optimize operations, and achieve sustainable growth through intelligent, scalable technologies.

By combining advanced AI with human expertise, we create intelligent systems and impactful digital experiences that enhance efficiency, strengthen brands, and accelerate business growth.

1.2 OUR STRATEGY

VISION

To become a global leader in AI innovation by creating intelligent technologies that shape the future of industries and communities.

MISSION

To empower businesses with innovative AI solutions that simplify operations, enhance productivity, accelerate digital transformation, and create a better future.

1.3 OUR JOURNEY

2026

Leading the Next Wave of AI

MabuhayTech continues to expand its AI ecosystem through intelligent software, digital humans, generative AI, automation, and enterprise solutions. Backed by global partnerships, we help organizations accelerate digital transformation through practical, scalable AI innovation.

2024

Transforming Ideas into AI Solutions

Our AI technologies evolved into real-world products and services. With the launch of our AI image generation solutions in Japan and our strategic partnership with Beyond AI, we accelerated AI research, expanded our capabilities, and began delivering scalable AI solutions across industries.

2025

Scaling Through Global Collaboration

As demand for AI solutions grew, MabuhayTech expanded its operations, relocated its headquarters to the Philippine Stock Exchange (PSE) Tower in Bonifacio Global City (BGC). This milestone strengthened our position as an AI development hub, delivering advanced software, automation, digital humans, and AI-driven solutions to clients worldwide.

2023

Building the Foundation

MabuhayTech was established in Manila to combine software engineering, creative technology, and artificial intelligence. We invested in AI research and built the foundation for delivering intelligent digital solutions to global markets.

1.4 MESSAGE FROM OUR CEO

"We are entering a new era where AI will profoundly transform how we live and work."

While some view AI as a force that will replace human roles, we see it differently. We believe the greatest value of AI lies not in replacing people, but in empowering them. Behind every intelligent system are human ideas, creativity, and purpose. AI is at its best when it works alongside people, enabling them to focus on what they do best—creating, solving problems, and driving meaningful progress.

At MabuhayTech, this belief is at the heart of everything we do. Our mission is to develop AI solutions that are practical, responsible, and human-centered, helping organizations accelerate digital transformation while creating lasting value for society. We are committed to making advanced AI accessible, scalable, and impactful for businesses of every size.

As we look to the future, we remain guided by a simple vision: a world where people and AI grow together. Through innovation, collaboration, and a shared commitment to excellence, we will continue building technologies that empower businesses, enrich lives, and create a smarter, more sustainable future for generations to come.

We engineer the bright future with human heart.

WHAT WE DO

MabuhayTech delivers AI-powered software, automation, and digital solutions that help businesses improve efficiency, enhance productivity, and accelerate digital transformation. Our expertise spans custom software, generative AI, digital humans, cloud solutions, and intelligent business applications.

Complementing our technology services, our Creative Department uses AI-powered tools to create professional visuals, marketing content, and video productions that strengthen brands and enhance customer engagement.

2.1 OUR SERVICES

AI SOFTWARE DEVELOPMENT

BUILD SCALABLE DIGITAL PRODUCTS

We build secure, scalable web, mobile, and enterprise applications tailored to your business needs using modern technologies and AI-powered development.

WHAT WE DO

- Custom Software Development
- Web & Mobile (iOS & Android) Applications
- Enterprise Systems & SaaS Platforms
- API Development & Integration
- Cloud Solutions & Modernization
- Maintenance & Technical Support

WHAT YOU CAN ACHIEVE

- Accelerate digital transformation
- Automate business processes
- Improve operational efficiency
- Reduce manual work
- Scale your business faster
- Secure and future-proof your technology

2.1 OUR SERVICES

CREATIVE AI

NEXT-GENERATION CREATIVE SOLUTIONS

Our Creative AI team creates high-quality visuals, videos, advertising materials, and digital assets using advanced generative AI technologies combined with professional creative direction.

WHAT WE DO

- AI Image Generation
- Commercial Advertising
- Product Visualization
- AI Video Production
- Motion Graphics
- Photo Manipulation

WHAT YOU CAN ACHIEVE

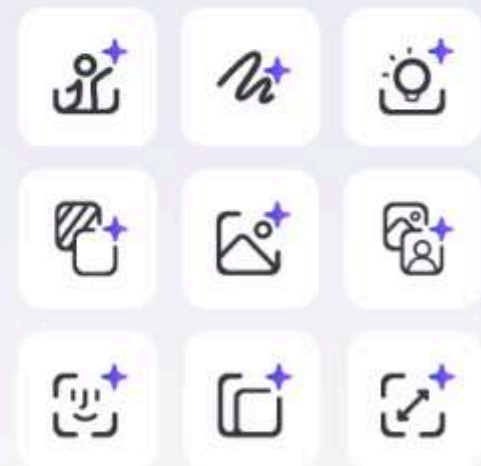

- Faster Content Production
- Lower Production Costs
- Consistent Brand Identity
- High-Quality Marketing Materials
- Increased Campaign Performance
- Unlimited Creative Possibilities

2.2 OUR SOLUTIONS

photo81

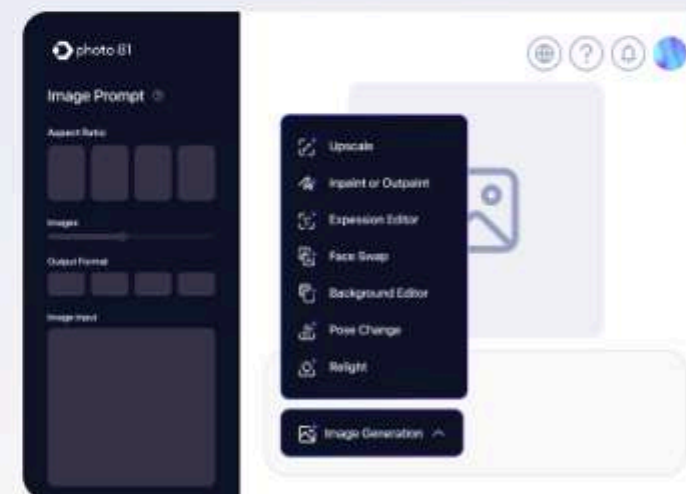

photo 81 brings powerful tools together in one seamless experience, from advanced image generation to intelligent image editing, all accessible with just a single click. photo 81 eliminates the need to switch between multiple applications. Everything you need, from enhancing visuals to transforming concepts into polished outputs, is unified in a single, intuitive interface.

By automating complex processes and reducing repetitive tasks, Photo 81 empowers creatives to focus on what truly matters — storytelling, innovation, and producing high-quality results faster and more efficiently.

All-in-One Creative Tools

Built a multi-tool web app with a lightning-fast UI, including image and video generation, editing, and transformations.

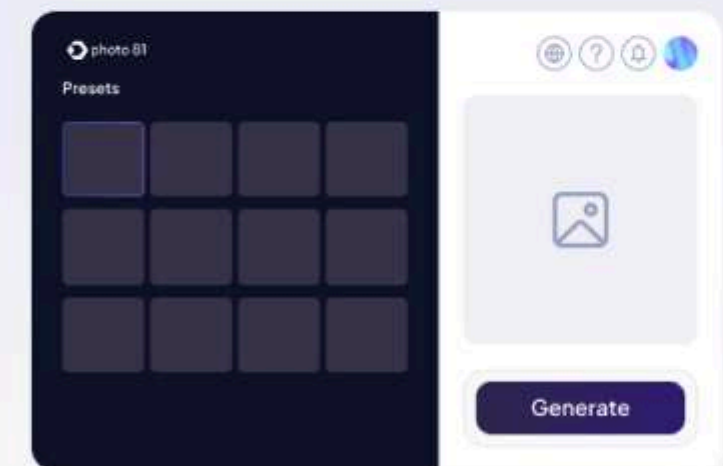

Seamless Workflow Between Tools

Created a unified interface that lets outputs from one tool be instantly used in another, streamlining the creative process.

Organized Asset Management

Developed a file system to manage user-uploaded and AI-generated assets efficiently. Projects stay organized and easily accessible.

Prompt-Free Image Generation UI

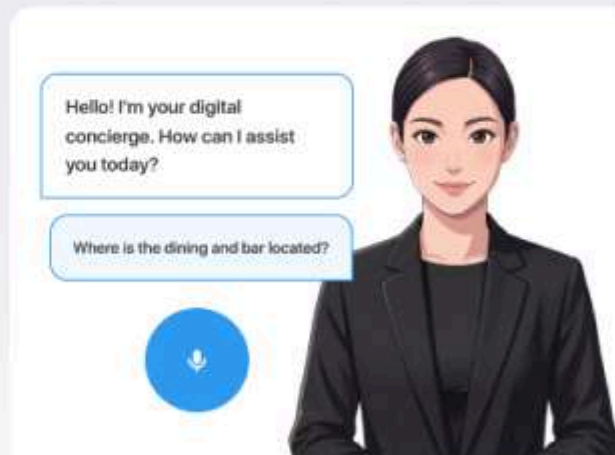

Designed an intuitive generation interface powered by smart presets and guided controls. Users can create high-quality visuals without writing complex prompts.

2.2 OUR SOLUTIONS

concierge81

concierge81 is an intelligent AI concierge that provides 24/7 multilingual support through natural voice and chat, helping guests quickly access the information they need. Through natural conversation via voice or chat, it handles facility guidance, nearby tourist information, FAQ support, and promotional messaging — reducing staff burden and improving customer satisfaction.

concierge81 is built around seven core strengths: multilingual communication, natural voice & chat interaction, full brand customization, continuous learning, live human support fallback, cost-effectiveness, and 24/7 availability.

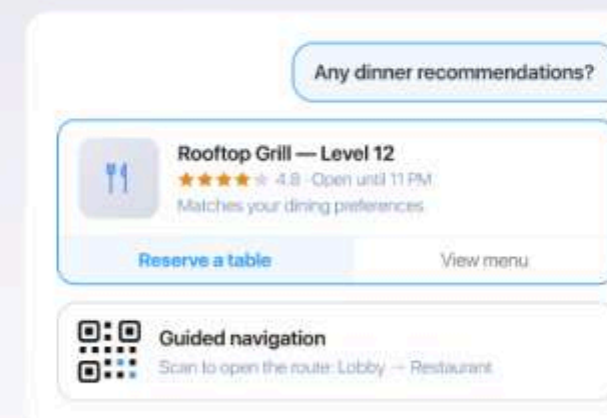

Natural, Human-Like Conversations

Guests interact naturally through voice or chat, with AI that understands context and follow-up questions.

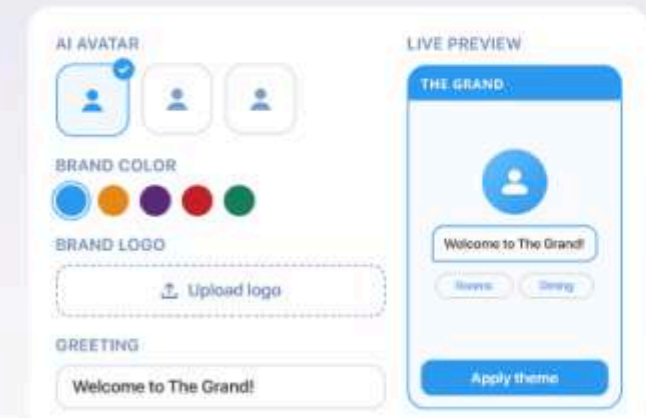

24/7 Multilingual Support

Provide instant assistance in multiple languages, anytime—day or night, even during weekends and holidays.

Intelligent & Personalized Assistance

Delivers accurate answers, personalized recommendations, and guided navigation using your property's information.

Fully Customizable Experience

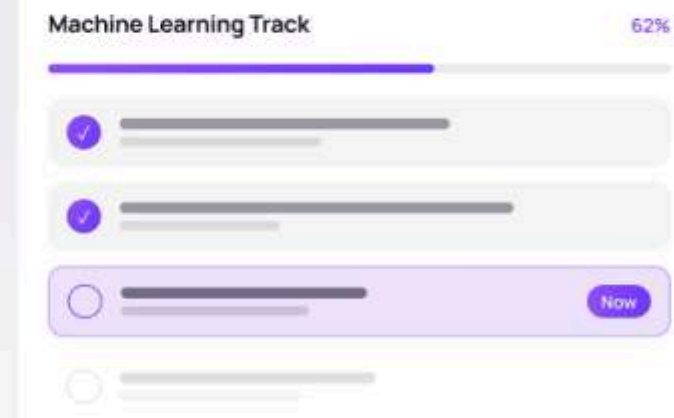

Customize the AI avatar and interface to match your property's branding and guest experience.

2.2 OUR SOLUTIONS

AI Academy

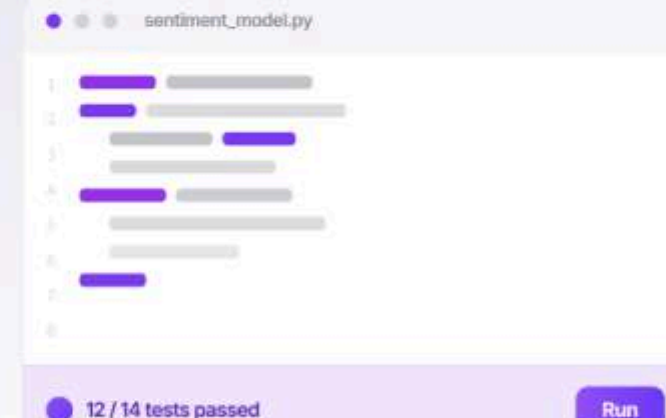

AI Academy is a comprehensive learning platform designed to help individuals, professionals, and organizations develop practical AI skills through structured courses, hands-on projects, and real-world applications.

From AI fundamentals to advanced automation, prompt engineering, machine learning, and AI-powered business solutions, AI Academy provides accessible and engaging learning experiences that enable learners to confidently adopt AI technologies in their work and daily lives. Built to support continuous learning and career growth, AI Academy combines expert-led content, interactive exercises, certification programs, and personalized learning paths to prepare learners for the future of work.

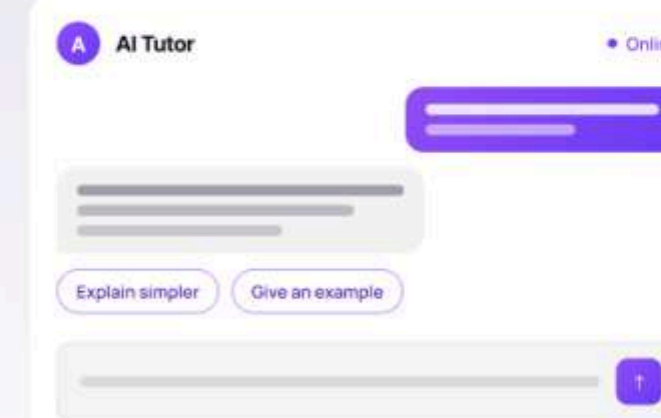

Structured AI Learning Paths

Follow a guided curriculum designed to help learners build AI skills progressively and effectively.

Hands-On Projects & Practical Training

Apply AI concepts through real-world projects, exercises, and interactive learning experiences.

AI Learning Assistant & Support

Receive instant guidance and personalized recommendations from an AI-powered learning companion.

Certification & Skill Development

Earn certifications while staying updated with the latest AI technologies and industry practices.

2.2 OUR SOLUTIONS

Live81

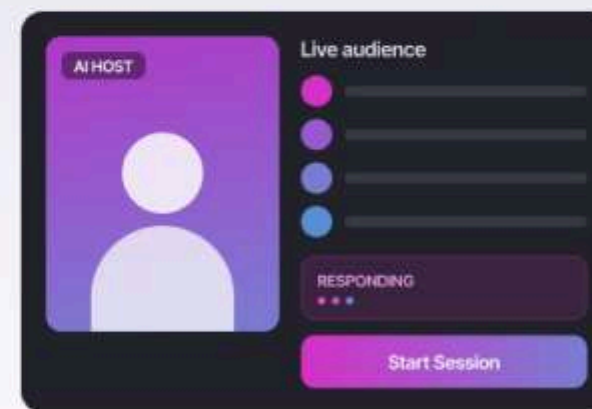

AI Live Streaming is an advanced platform that enables users to instantly create AI-powered live broadcasts using face swap technology. By uploading a single image, users can transform their appearance in real time and stream live across multiple platforms while maintaining natural facial expressions, movements, and interactions.

Designed for content creators, businesses, influencers, educators, and virtual hosts, the platform provides a fast and scalable way to create engaging live experiences without requiring expensive production setups or on-camera talent. Powered by real-time AI processing, AI Live Streaming combines face swapping, digital avatars, multilingual communication, and live audience engagement to redefine modern content creation.

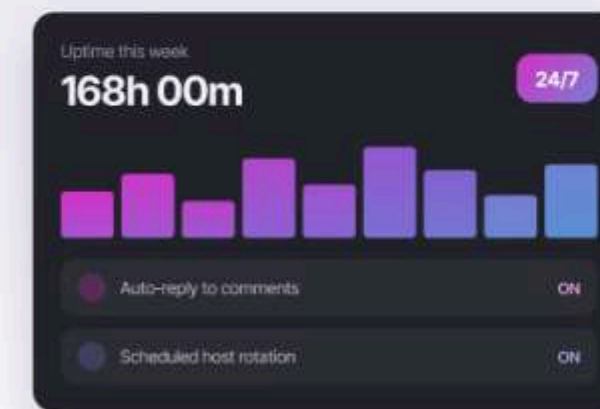

Real-Time AI Face Swap

Transform any uploaded image into a live presenter with realistic facial movements and expressions during live broadcasts.

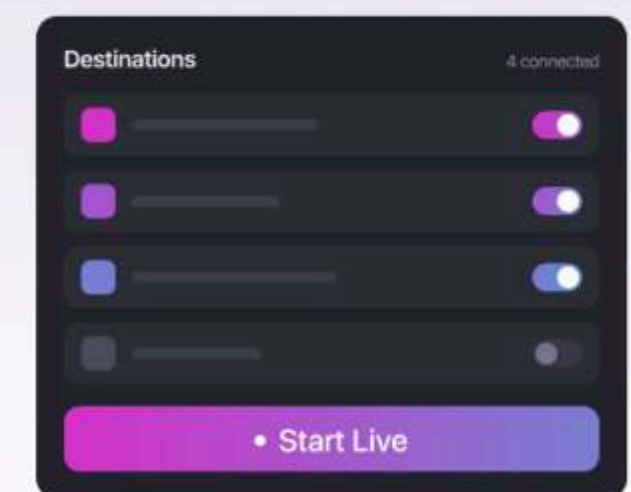

AI Digital Human Streaming

Create virtual hosts capable of presenting, communicating, and engaging with audiences in real time.

24/7 Automated Live Engagement

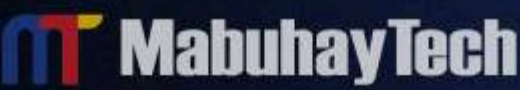

Maintain continuous audience interaction through AI-powered live hosts available anytime.

Multi-Platform Broadcasting

Stream simultaneously across multiple platforms and channels from a single live session.

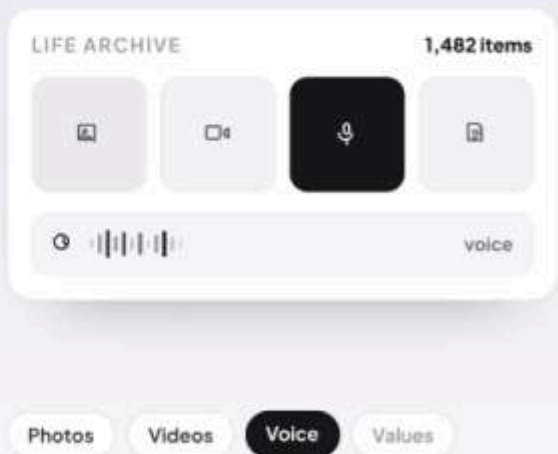

2.2 OUR SOLUTIONS

memory81

Memory81 is a digital life archive AI that helps individuals preserve their personal memories, stories, values, voice, photos, videos, messages, and end-of-life preferences in one secure and organized platform. By continuously learning from a person's life experiences and engaging them through meaningful questions, Memory81 captures important stories and personal thoughts that may otherwise be forgotten.

Designed for individuals and families, the platform helps create a lasting digital legacy that can be passed on to loved ones. After a person passes away, their preserved memories and personal content can be transformed into Memorial Portrait AI, allowing family members to revisit their stories, voice, messages, videos, and AI persona as part of a meaningful memorial experience.

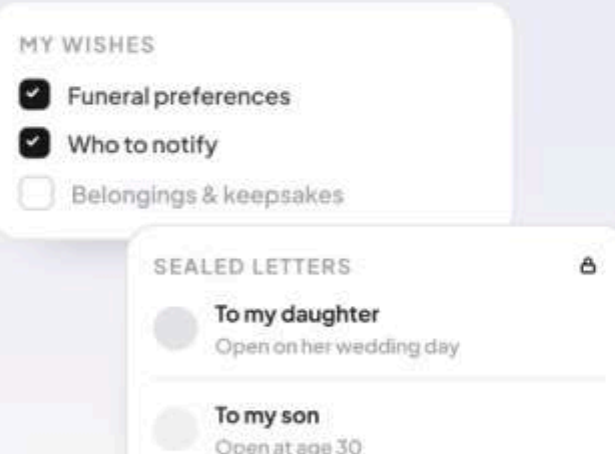

Instant Visitor Assistance

Provide immediate answers to common questions and guide website visitors to the right information without waiting for a support representative.

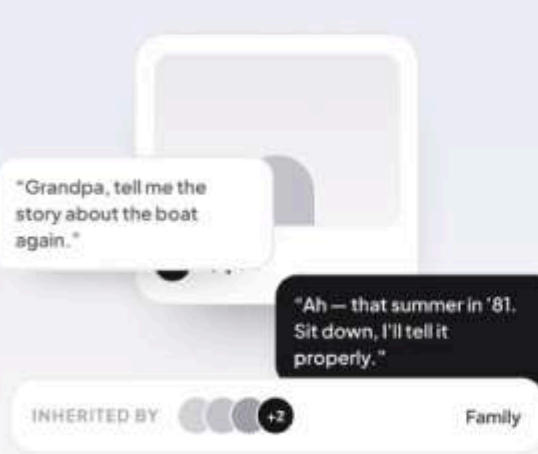

AI-Powered FAQ Support

Automatically understand and respond to frequently asked questions using natural language for a more conversational experience.

Lead & Inquiry Handling

Collect visitor inquiries and important information while helping potential customers find the services or solutions they need.

24/7 Customer Support

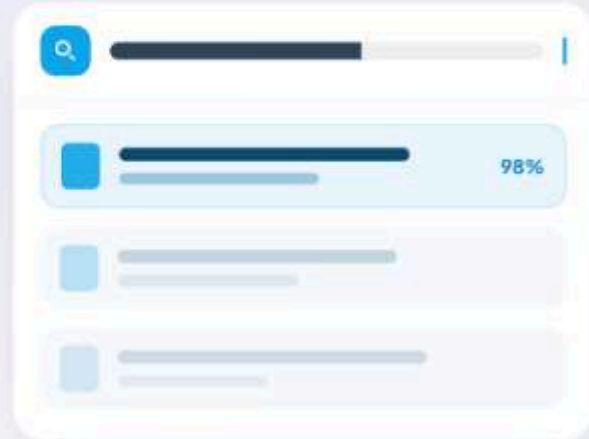

Keep your website available as a support channel around the clock, including outside regular business hours.

2.2 OUR SOLUTIONS

Internal Knowledge-Based AI

An Internal Knowledge-Based AI is an intelligent assistant that provides employees with instant access to company knowledge, documents, policies, procedures, and internal information. By connecting AI with an organization's trusted knowledge sources, employees can ask questions naturally and receive relevant answers without manually searching through multiple files or systems.

Designed for businesses and organizations, the platform helps centralize internal knowledge and improve workplace efficiency. Employees can quickly find the information they need while maintaining consistent access to approved company resources.

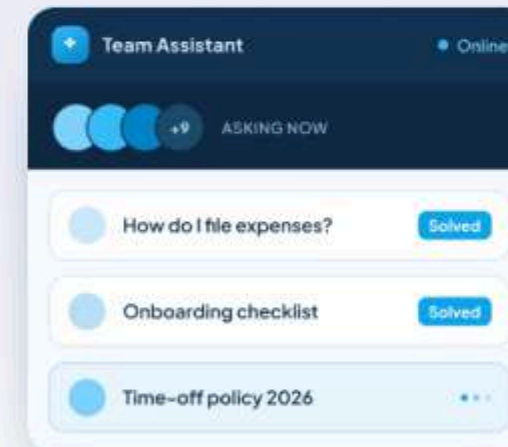

AI Knowledge Search

Quickly search and retrieve relevant information from company documents, manuals, policies, and internal resources using natural language.

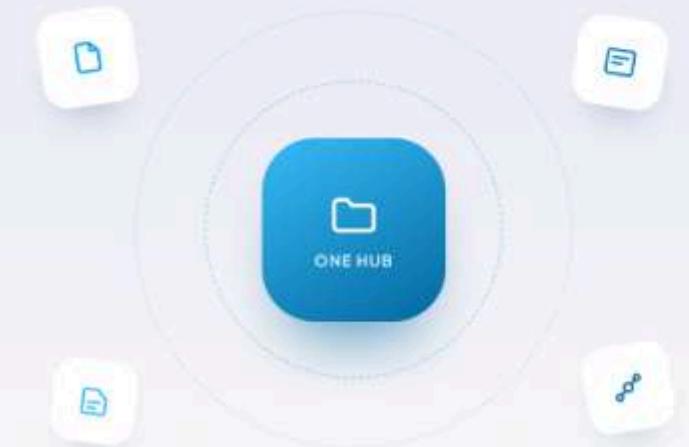

Document-Based Answers

Generate accurate responses based on the organization's approved knowledge sources instead of relying on general AI information.

Internal Team Assistant

Support employees with everyday questions about company processes, workflows, guidelines, and procedures.

Centralized Company Knowledge

Bring scattered information into one intelligent knowledge system, making important company resources easier to access and maintain.

2.2 OUR SOLUTIONS

Stock Investment Analysis System

This application is designed to analyze stock market data and support the development and evaluation of trading strategies. It provides a platform where financial data can be processed and examined to better understand market behavior and potential investment opportunities. The system is developed as an internal tool for the client, intended to support research, analysis, and strategic decision-making related to stock trading.

It focuses on stocks listed on the Tokyo Stock Exchange (TSE) and provides quantitative analysis of historical and current market data. Users can evaluate stock performance, study market trends, and gain insights through structured data analysis.

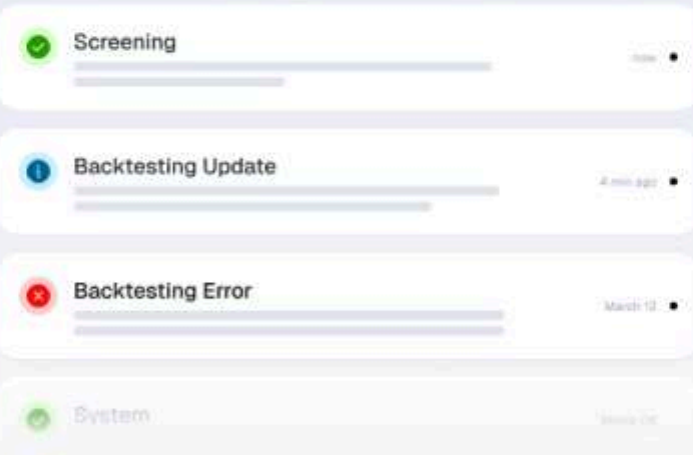

Fast Stock Screening

Screens 10,000 stocks in under 5 seconds using pre-calculated data for instant insights. Quickly find the best opportunities without waiting.

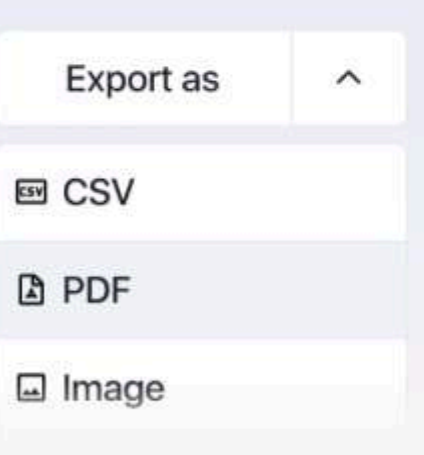

Efficient Strategy Backtesting

Simulates 5 years of trading strategies in 5–8 seconds for rapid evaluation. See how strategies would have performed in the past almost instantly.

Automated Notifications & Reporting

Alerts users when new screening data is available and generates reports automatically. Stay updated effortlessly with real-time alerts and ready-to-use reports.

Easy Reporting and Data Export

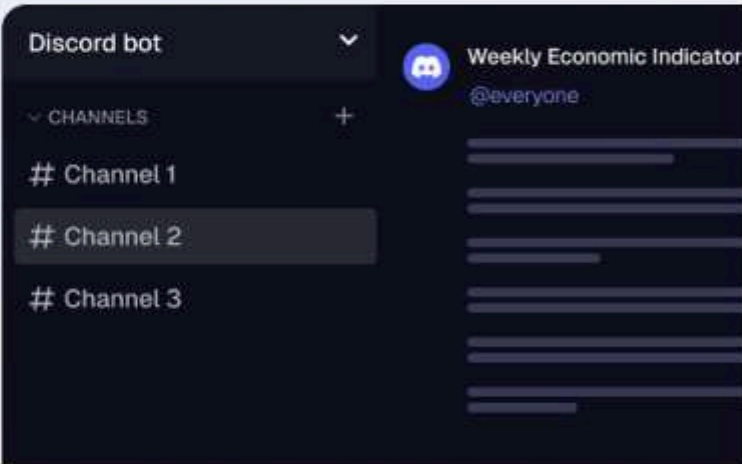

Users can automatically generate reports and export data in multiple formats for further analysis, sharing, or documentation. This makes it easy to review results and keep records.

2.2 OUR SOLUTIONS

Discord Autoposting Bot: Real-Time Financial Updates

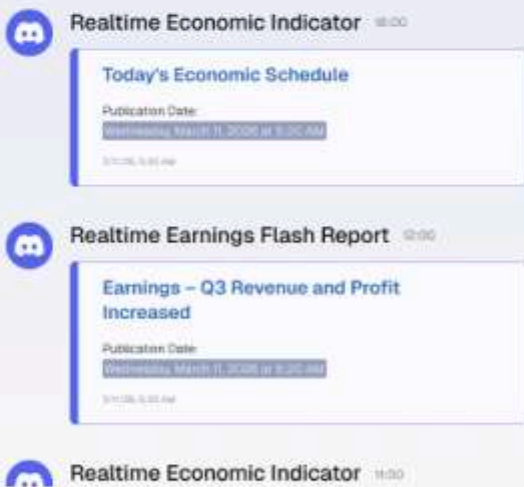

The Discord Autoposting Bot is a powerful tool designed to automatically gather and deliver the latest financial news, market trends, and key economic insights directly to your Discord server. By automating content sharing, it eliminates the need for manual posting, ensuring your community receives timely, accurate, and well-organized updates without any extra effort.

With the Discord Autoposting Bot, you can transform your server into a dynamic hub for financial intelligence, giving your community the tools to monitor market movements, track economic indicators, and make informed decisions—all automatically.

Automated Multi-Channel Posting

The bot posts scheduled updates to multiple Discord channels, including earnings alerts and weekly economic reports. This ensures timely and consistent delivery without manual work.

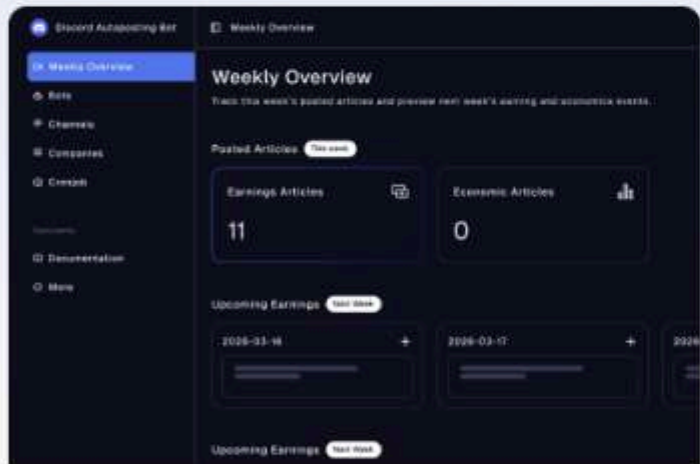

Intelligent Data Collection & Filtering

The system automatically collects articles, earnings reports, and economic event data. It filters relevant content using keywords and date grouping.

Visual & Contextual Enhancements

The bot generates visuals like tables and company logos automatically. It also adds AI commentary for clear weekly summaries.

Customizable & User-Friendly Dashboard

Admins can configure posting settings per channel and manually trigger updates through a simple dashboard. This gives full control while keeping the system intuitive and easy to manage.

2.2 OUR SOLUTIONS

Crypto Lending & Borrowing Platform

The Takeda Cryptolending App is a secure, web-based platform designed for cryptocurrency enthusiasts who want to grow their digital assets effortlessly. By combining ease of use with advanced security measures, it offers a reliable way to lend, borrow, and earn interest on cryptocurrencies.

Comprehensive account management and transaction tracking ensure that every activity is transparent and under the user's control. Ideal for crypto holders seeking passive yield without sacrificing security or convenience, this platform transforms digital asset management into a simple, efficient, and rewarding experience.

Seamless Crypto Management

The platform allows users to deposit, withdraw, and manage their digital assets effortlessly. Daily interest withdrawals ensure users can access earned returns anytime.

Secure, Innovative Architecture

Data and crypto transactions are fully protected with advanced security measures. You can confidently manage your assets anytime, knowing your funds and information are safe.

Referral-Driven Growth

A built-in referral program rewards users for bringing new participants to the platform. This incentivizes organic growth while providing additional passive income opportunities for users.

Comprehensive Account Control

Users can update profiles, change passwords, and manage withdrawal addresses securely. Every transaction is tracked and stored, giving users full visibility of their account activity.

WHY CHOOSE MABUHAYTECH?

Your **Trusted Partner** in AI, Software, and Digital Transformation

At MabuhayTech, we combine technical expertise, AI innovation, and creative excellence to deliver intelligent solutions that help businesses innovate faster, improve efficiency, and achieve sustainable growth. We work as an extension of your team, providing scalable solutions tailored to your business goals.

3.1 WHY CLIENTS CHOOSE US

01

AI & Software Expertise

We combine AI, software engineering, cloud technologies, and automation to build scalable solutions for modern businesses.

02

Global Engineering Talent

Our engineers deliver reliable, high-quality software and AI solutions that meet international standards and business requirements.

03

Creative + Technology

We combine software engineering, AI, and creative production to deliver engaging digital experiences, content, and innovative products.

04

Fast Team Deployment

We move quickly without compromising quality, ensuring transparent communication and consistent project execution.

05

Business-Focused Innovation

We align technology with business objectives, developing practical solutions that improve efficiency, customer experience, and growth.

06

AI-Powered Creative Production

From AI-generated visuals and videos to digital humans, marketing assets, and branded content, we help businesses create at scale with speed and consistency.

3.2 ENGINEERING PROCESS

How software gets built

Five simple steps that take a business goal to a running, maintained system.

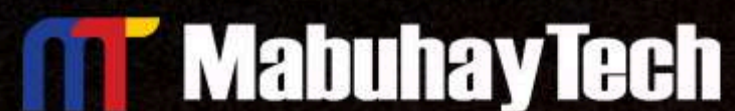

3.3 CREATIVE PROCESS

How creative gets made

A directed pipeline from brand understanding to production-ready assets.

Let's Build the Bright Future Together.
